Presentation on the Taron Cesium Deposit June 20, at the RFG Conference

Mssrs. David Trueman P.Geol and Bruce Downing P.Geol will be presenting a paper on the Taron Cesium Deposit at the Resources For Future Generations, 2018 conference in Vancouver, Wednesday, June 20th.

This prestigious conference is being put on jointly by the Canadian Institute of Mining, Metallurgy and Petroleum, the Geological Association of Canada, the Mineralogical Association of Canada, the Canadian Geological Foundation, Canadian Confederation of Earth Sciences, the International Union of Geological Sciences and the National Research Council Canada and is expected to draw geoscientists, globally.

The talk, which is being presented by Mr. Downing, will provide an update of work and research on the Taron cesium and thallium deposit, and will offer insight as to how this rare and unique deposit was formed.
